## PROJECTS

### React Weather App

- Created an responsive single page application using react.
- This website tells users the weather of their desired city.
- Used open weather API and integrated it to fetch data and displayed it on my user interface.
- Added a dynamic background which changes in accordance with the weather.

<https://github.com/HimanshuDeveloperr/weather-app>

### Pokemon app

- Created an app using next js library where user could search and get the detailed characteristics of their Pokemon.
- Used an open source API to fetch and display the results that user seek .
- I had given a separate dynamic background to my each Pokemon card such that each Pokemon has their own color background.

### E-Commerce

- Created an e commerce app from where you can buy products of your choice.
- This is a react app which basically uses hooks to update the states,to pass the content.
- Used react router to navigate through the links and make our app single page app.
- Created an authentication using Firebase functionality such that authenticated user could only access my store.
